

Dear FCC and Congressmen,

I use my XM satellite radio daily. I count on it for entertainment, news and information that I can not get off the local radio stations. I pay for this service happily because the local broadcasters in my area fill the airwaves with "IN MY OPINION" is garbage. My local radio stations in the Philadelphia area choose to fill the night airwaves with INFO-MERCIALS and paid advertising for hours on end. The wonder vitamins and suppliments advertisements that say they have the cure for all the sickness of modern man. The shows I enjoy are pre-empted by this content. I understand they have the right to air this stuff, but I also have the right to choose to purchase a quality radio service like XM.

XM satellite radio offers me a variety of news, talk and a wonderful variety of music to suite any mood myself or my family may be in.

I also have used their Traffic News to notify me of accidents in my area some of which have been within a few miles of my home. The info is available when I want it.

Please do not allow NAB to take my right to purchase quality service away from me. Do not allow their money and lobbyists to influence your rule making. XM satellite is their competition. They need to step up to the plate and offer a better radio service for listeners if they want to win us back rather than buy big gun lobbyists to influence you.

This is supposed to be AMERICA, the land of FREEDOM. I choose to say no to poor broadcasting services and use a qulaity alternative service like XM satellite.

I will be pretty darn angry if you allow The National Association of Broadcasters to ruin this wonderful service. I will be watching this issue closely and I vote regularly.

I am counting on you to do the right thing and not stiffel competition. Think about why people are willing to pay \$9.99 a month for this service rather than listen to the FREE stuff off the air waves. The FREE stuff is awful. the music is the same canned 30 songs, their talk radio for the most part is the same thing day in and day out....XM is like a breath of fresh air. I have a choice to listen to a huge variety, it is always crystal clear. It is a good quality service.

I urge you to leave XM Satellite Radio alone and don't screw up a good thing!

Sincerely,
Mark Keefer
